

LAB NOTES

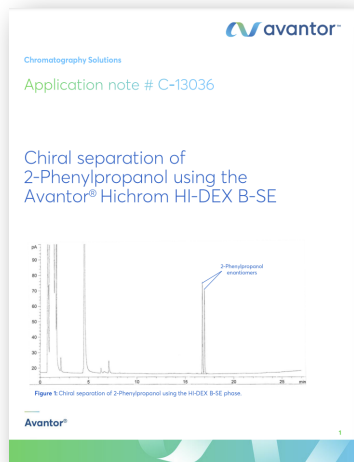

Academic Research Industry

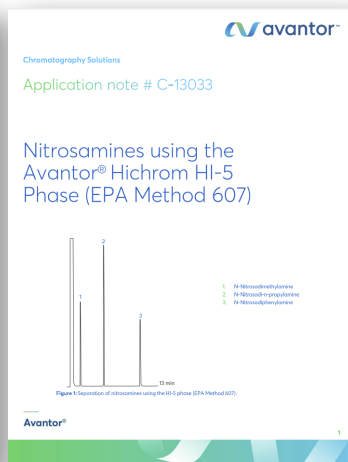

Academic research fuels innovation and supports other industries with their research and development projects. Chromatographers in academic research need innovative chromatography products to help support method development projects. Our new **Academic Research Page** offers many technical reports, white papers, and webinars designed to jump-start method development for academic chromatographers.

Avantor® ACE® Method Development Kits are available to help initiate and accelerate method development projects, and you get 3 columns for the price of 1!

GC APPLICATIONS

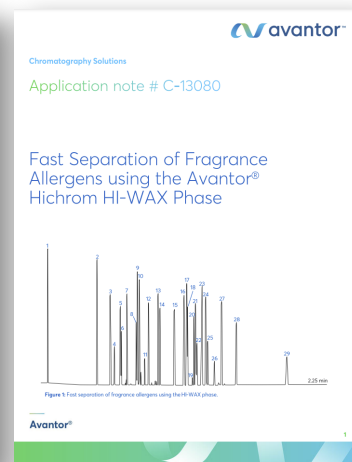

2-Phenylpropanol

Nitrosamines

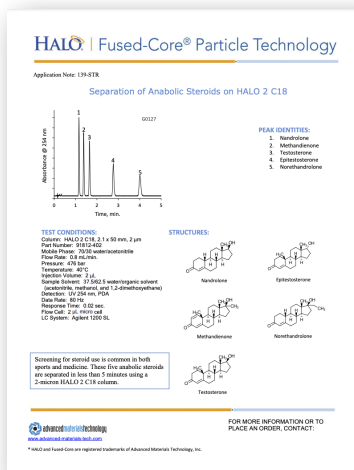

Residual Solvents from Food Packaging

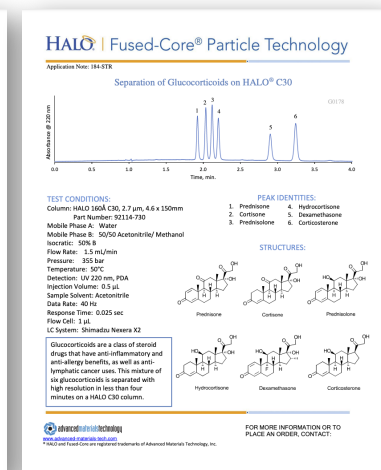

Fast Separation of Fragrance Allergens Using a HI-WAX Phase

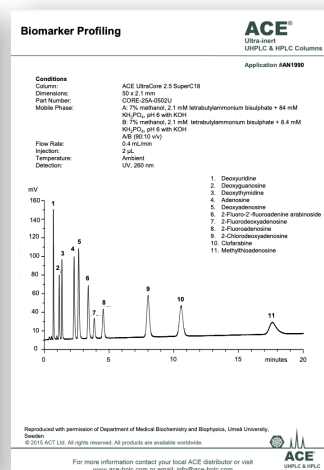

LC APPLICATIONS

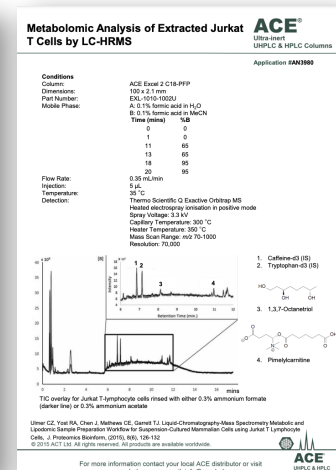

Anabolic Steroids

Glucocorticoids

Biomarker Profiling

Metabolic Analysis of Extracted Jurkat T Cells by LC-HRMS
