

LAB NOTES

Industrial Chemical Applications

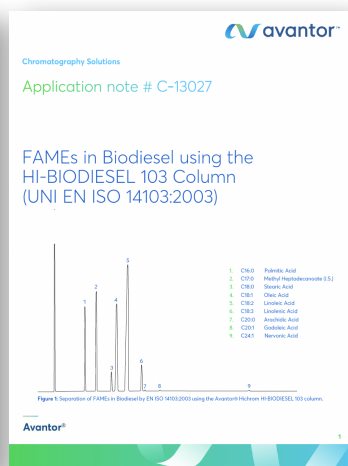

The analysis of industrial chemicals supports the development and manufacture of chemical products, including cosmetics, petrochemicals, pesticides, herbicides, insecticides, fungicides, polymers, monomers, and many more. Our new **Industrial Chemical Industry Page** has many resources created specifically for industrial chemical chromatographers.

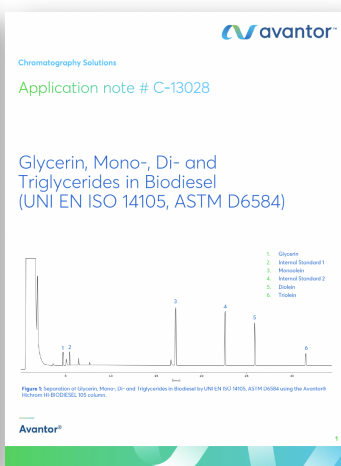

GC APPLICATIONS

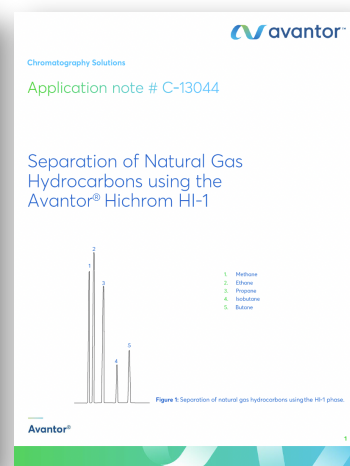

Biodiesel

FAMES in Biodiesel

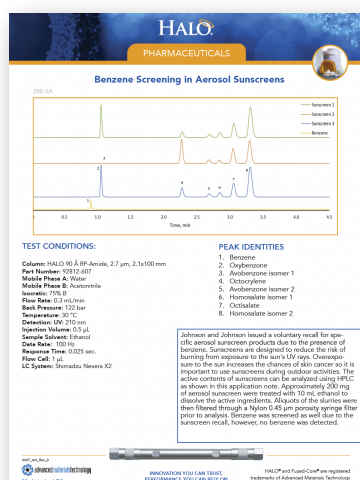

Glycerin, Mono-, Di- & Triglycerides in Biodiesel

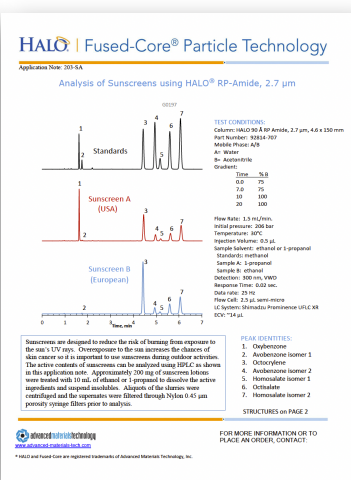

Natural Gas Hydrocarbons

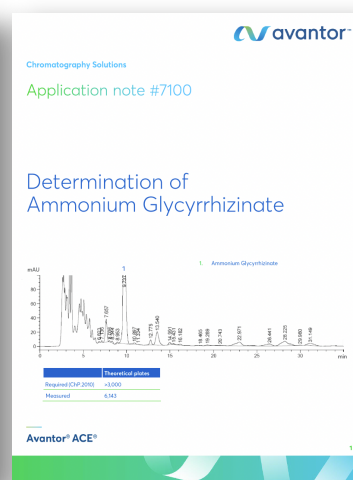

LC APPLICATIONS

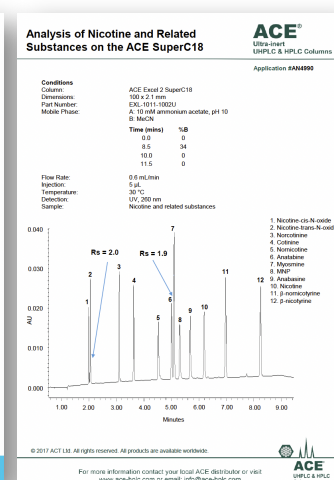

Benzene Screening in Aerosol Sunscreens

Analysis of Sunscreens

Determination of Ammonium Glycyrrhizinate (from licorice root)

Nicotine and Related Substances
